Program Updates & Patches [More...](#)

2. Select Import Filter from left column
3. Locate the Filter you need. Be certain you have the correct vendor, as well as database name.
4. Click on Download
5. Save file [when asked "Do you want to run or save file?"]
6. Save file to your EndNote Filters folder [which by default resides inside your Endnote program folder]
7. The icon for a Filter will look like this:
