**PREFACE**  
Fifth Edition

This Index includes a compilation of references to journal articles and book information providing descriptions, samples of and entire copies of measurement and assessment tools/instruments and questionnaires (physical and psychosocial content) useful for nurses and allied health workers. The purpose is to provide ready access to many tools that are scattered throughout the literature and are difficult to locate. All entries have complete bibliographic information and are available at the CSUS Library. Many instruments appear in materials that the CSUS Library does not own, these are not included.

References are to works that include sample portions of instruments or the entire instrument whenever possible and information for obtaining the instrument.

Instruments from the sociological and psychological literature are included if deemed useful for the health care worker.

The fifth edition includes 1,367 entries, an additional 453 since the fourth edition. This edition is available for library use in hardcopy on the reference and circulating shelves and electronically from the Library's homepage at <http://library.csus.edu>. From the homepage click on Databases & Article Searching, **Research Guides**, scroll to the title of this publication and open. Or use the url: <http://library.csus.edu/guides/rogenmoserd/heas/nursing2008.pdf>

Pro-Cite® 5 software was used for compiling the bibliography. Microsoft Word was used for the printed Index.

## **ACKNOWLEDGEMENTS**

(First Edition)

Inger M. Lindholm, a nurse friend, was the inspiration for this Index. Approximately ten years ago she began persuading me to search for and create an index listing assessment tools useful for nurses. During the intervening years a heightened interest in the creation and application of assessment instruments appropriate for workers in the health care field has furthered the need and interest in the production of this index. It has taken many years to comprehend the scope of this request, follow through, gather, and compile these instruments into an index.

Special thanks also to Pairlee Berry and Tina Hua, CSUS Library Systems Office, Eddy Hogan, formerly Electronic Information Services Librarian at CSUS, and Leilani Hall, CSUS Reference Librarian, Science & Technology, for their able and patient assistance and to all other co-workers whom I may have aggrieved along the way.

The funding to support this project was obtained from the FACULTY PROFESSIONAL DEVELOPMENT MINI-GRANT PROGRAM, Academic Year 1996-1997. I appreciate being selected by the Academic Senate's Ad Hoc Research, Creative Activity & Mini-grant Subcommittee as a recipient for this award.

## **INTRODUCTION**

Fifth Edition

The Index is divided into two sections: **Reference List** and **Keyword & Instrument Name Index**.

The **Reference List** is arranged alphabetically by authors' names and each entry is preceded by a number corresponding to the numbers used in the **Keyword & Instrument Name Index** (numbers are not page numbers).

The **Keyword & Instrument Name Index** is arranged in alphabetical order. Included are the names, abbreviations or acronyms of the instruments, subject descriptors and keywords. The subject descriptors are derived from controlled vocabulary used in the **CINAHL 2003 Subject Heading List (Cumulative Index to Nursing and Allied Health Literature)** and older subject heading lists. Keywords were assigned if the controlled vocabulary did not suffice.

Items in the Keyword section included under the "General" designation are references to books that describe many instruments in broad subject areas. Instruments referred to under General may include samples, the entire test or provide only a description of the applicability and validity for the instrument and a source for obtaining the instrument. All other entries include at least some sample questions used in the instrument or the entire instrument.

Information for the Index was gathered by searching the print version of the **Cumulative Index to Nursing Literature (CINAHL)** from 1956 - 1981 and the electronic version of **CINAHL** from 1982 to the present. The EUREKA Online Catalog was searched to locate monographic information. Browsing book and journal literature and pursuing bibliographic leads also provided sources.

Determination of reliability and validity of the instruments referenced in the Index is the responsibility of the user.

No Grant funding was provided for the preparation of the second, third, fourth or fifth editions of this index.

Special thanks are extended to Pairlee Berry for her able technical assistance, Debbie Rogenmoser, Reference Librarian, and Andy Osburn, Library Systems, for placing the Index on the Library server.

**ELECTRONIC ACCESS TO MEASUREMENT & ASSESSMENT  
TOOLS/INSTRUMENTS & QUESTIONNAIRES**

The following electronic indexing services provide access to the current literature and may include information on assessment instruments.

Cinahl Information Systems

***CINAHL, Cumulative Index to Nursing & Allied Health***

**CINAHL Plus with Full Text** provides access to virtually all English-language nursing journals and publications from the national nursing associations as well as from many allied health disciplines and pertinent articles from biomedical, educational, behavioral sciences, management, and the popular literature. Instruments can be searched by title, author, text words, subject heading or by "limiting" to the document type: **Research Instrument**. Some full text articles included.

The Web version via EBSCO is available from 1937 - present. Students and faculty of CSUS and on-site library users may access the Web version. Students and faculty of CSUS have remote privileges.

***PsycINFO (Psychology & Related Fields)***

**PsycINFO (EBSCO)** indexes journal literature from 1887 to the present. English-language books and book chapters are included. All areas of psychology are covered as well as behavioral literature in related fields such as law, business, and medicine. Instruments can be searched by title, author, text words, subject heading or by "limiting" to the field: TM Tests & Measures. Some full text articles included.
